Mobil SHC™ 600 Series
Synthetic circulating and gear oils

Your gearboxes operate under extreme conditions. That’s why we formulated Mobil SHC™ 600 Series oils to deliver:

- Equipment protection at high and low temperatures
- Long oil life, helping to limit maintenance and replacement costs
- Trouble-free operation and long filter life

Key benefits

- Help achieve peak productivity by optimizing equipment uptime
- Minimize maintenance through exceptional protection, even in extreme conditions
- Help limit power consumption, which can minimize your cost of operation

Up to 3.6% reduced energy consumption versus conventional oils in field and laboratory tests*

*Energy efficiency relates solely to the fluid performance when compared with conventional reference oils of the same viscosity grade in gear applications. The technology used allows up to 3.6 percent efficiency compared with the reference when tested in circulating and gear applications under controlled conditions. Efficiency improvements will vary based on operating conditions and applications.

†Typical properties are typical of those obtained with normal production tolerance and do not constitute a specification. Variations that do not affect product performance are to be expected during normal manufacture and at different blending locations. Mobil SHC™ 600 Series

Bearing wear protection
In FAG FEB bearing testing, Mobil SHC™ 600 Series lubricants protect bearings significantly better than conventional oils.

Product consolidation
Mobil SHC 600 Series oils provide opportunities for product consolidation. In some instances, Mobil SHC™ 630 oil can replace a mineral ISO VG 150, 220 and 320, reducing lubricant route complexity and inventory.

At low temperatures, Mobil SHC 630 (a synthetic ISO VG 220 oil) has similar viscosity to an ISO VG 150 mineral oil, allowing for enhanced low-temperature flow and startup.

At high temperatures, Mobil SHC 630 has the viscosity of an ISO VG 320 oil, allowing for critical component protection.

Energy efficiency
These thermographic images show how Mobil SHC 600 Series lubricants run approximately 15°C (30°F) cooler than conventional oil.*

Mobil SHC™ 600 Series lubricants run 20% cooler than conventional oil

Safety
Minimized maintenance and long service intervals help you mitigate potential employee risk arising from direct contact with equipment.

Environmental Care†
These lubricants help control your energy consumption, waste oil generation and maintenance-related waste.

Productivity
By helping you achieve trouble-free equipment operation, Mobil SHC™ 600 lubricants can help you achieve new heights of operational productivity.

Mobil SHC™ 600 Series
