Mobil SHC Cibus™ Series
High-performance synthetic lubricants for food processing machinery

Key benefits
- Protection against wear, rust and corrosion to help limit maintenance costs
- Potential energy savings for gear and hydraulic applications
- Optimal lubrication even at extreme low and high temperatures
- Formulated to be suitable under halal and kosher dietary laws and to be gluten-, nut- and wheat-free

With a wide range of applications in the food industry Mobil SHC Cibus™ Series NSF H1-registered lubricants are designed to help deliver:

- Increased productivity and decreased costs
- Ensuring elevated level of product integrity are maintained
- Excellent wear protection for critical equipment

Potential energy efficiency in gear applications
Mobil SHC Cibus™ Series oils show up to 3.6% overall efficiency improvement compared with mineral gear oils in proprietary worm gear bench tests, helping reduce energy consumption and maximize productivity.*

Potential energy efficiency in hydraulic applications
In tests using a vane pump under controlled conditions, Mobil SHC Cibus Series oils demonstrate overall efficiency improvement up to 3.5% compared to a mineral oil-based reference fluid.**

* Energy efficiency relates solely to the fluid performance when compared to conventional (mineral) reference oils of the same viscosity grade in circulating and gear applications. The technology used allows up to 3.6% efficiency compared to the reference when tested in a worm gearbox under controlled conditions. Efficiency improvements will vary based on operating conditions and applications.

** Energy efficiency relates solely to the fluid performance when compared to Mobil DTE™ 25. The technology used provides up to 3.5% efficiency compared to the reference when tested in an Eaton 25VMQ vane pump under controlled conditions. Efficiency improvements will vary based on operating conditions and applications.

Oxidation stability and oil life
Mobil SHC Cibus Series lubricants demonstrate long oil life and enhanced system cleanliness versus standard circulating oils as demonstrated in the proprietary Mobil Hydraulic Fluid Durability (MHFD) test rig, where, when comparing ISO VG 46 oils, the level of deposits in the reservoir is significantly less with Mobil SHC Cibus than with the mineral hydraulic oil.

Safety
By providing long drain intervals, Mobil SHC Cibus oils can help limit potentially hazardous interaction between employees and equipment.

Environmental Care**
Through potentially helping to reduce energy consumption, Mobil SHC Cibus oils can help reduce the environmental impact of your operation.

Productivity
Long drain intervals and reliable equipment protection can help enhance uptime and hours of operation, which can help you boost production.

ExxonMobil is comprised of numerous affiliates and subsidiaries, many with names that include Esso, Mobil, or ExxonMobil. Nothing in this document is intended to override or supersede the corporate separateness of local entities. Responsibility for local action and accountability remains with the local ExxonMobil-affiliate entities.

** Visit mobilindustrial.com to learn how certain Mobil-branded lubricants may provide benefits to help reduce environmental impact. Actual benefits will depend upon product selected, operating conditions and applications.

Health and Safety
Based on available information, these products are not expected to produce adverse effects on health when used for the applications referred to above and the recommendations provided in the Material Safety Data Sheets (MSDSs) are followed. MSDSs are available upon request through your sales contact office or via the Internet. These products should not be used for purposes other than the applications referred to above. If disposing of used product, take care to protect the environment.
